SUMMARY

Product Designer who brings simplicity to complex decisions, especially where money and trust are involved. Designed a group-ordering flow that splits the bill automatically at checkout, payment flows that state terms before anyone pays, rupee-first decision screens that cut retail decisions from 30 to 3 minutes in walkthroughs, and mobile experiences that turn confusing numbers into one clear answer. Derives problem statements from research and stakeholders, owns features from idea to high-fidelity prototype, and builds with Figma and AI tools such as Figma Make and Claude.

SELECTED PROJECTS

Toing | Group ordering with auto-split payments

Interviewed Gen Z users who order together and benchmarked competitor shared carts; found the group "coordinator" carries the load of collecting orders, tracking diets and chasing payments, and open-ended browsing stalls decisions.

- Designed a six-step flow from join link to locked order: shared dietary and budget preferences, a real-time group cart with allergy flags, a voting lobby, and one-tap checkout that splits the bill so each person pays by UPI or card.

RetailPilot | Rupee-first decision tool for Indian retail

Designed a decision inbox ranked by rupees at stake, one primary action per card and evidence labels on every number; walkthroughs showed 3-minute decisions, not 30, and ~40% less dead-capital risk.

Ola Electric Trip Confidence | Consumer mobile feature

Turned a distrusted battery percentage into one clear trip verdict (Comfortable, Tight, Not enough), built from four rider personas and a single recommended fix instead of a list.

EXPERIENCE

Freelance Product & UX Designer | Contract Jul 2025 - Present

- Owned features end to end across three client engagements, gathering requirements from founders, deriving problem statements and taking work from wireframes to high-fidelity prototypes and dev-ready Figma handoff.

UX Designer | Innovatum Aug 2024 - Jan 2025

- Diagnosed user drop-off as a wayfinding problem rather than a content gap, then restructured information architecture and navigation around task priority; task completion rose 27%.

Graphic Design Freelancer Jan 2023 - Jun 2024

- Designed brand identities, landing pages and digital assets for small businesses, building visual craft in typography, layout and colour.

SKILLS

Product & UX: Problem statements, end-to-end flows, interaction design, information architecture, wireframes, high-fidelity prototypes, payment, checkout and bill-split flows

Visual & Motion: Visual design, typography, colour, design systems and standards, motion specs

Research & Insight: User interviews, shadowing, competitive audits, personas, usability walkthroughs, A/B test planning

AI & Vibe-Coding: Figma Make, Figma AI, Claude, ChatGPT , Cursor , Antigravity , stitch

Tools: Figma, FigJam, Framer, Adobe Creative Suite, HTML, CSS

EDUCATION

PG Diploma, Visual Design & UX | IIT Hyderabad Jul 2025 - Mar 2026

BCA, Computer Application (UX Designing) Jun 2022 - Dec 2024
